The Copse Project

During our Friday Youth Club in December, many of our young people contributed to building bird boxes for the Copse. As part of the big vision for the Copse, the young peopel want to encourage more wildlife . As a result, the young people have been busy making these boxes which will be placed in trees of the Copse at a later date. The young people had a lot of fun making these and learning new skills that they had never done before. It was great to see their proud faces when they saw what they achieved from making pieces of wood and nails into beautiful and safe bird boxes. Keep an eye up high for these!
